-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Takegawa.

Takegawa discloses the use of a retaining device for a drum stand, the retaining device comprising a top clamping seat (see figure 1) and having arms divergently extending out of the top clamping seat and each arm provided with a claw adjustably(30) connected to the arm, a bottom seat adapted to be slide ably mounted on the drum stand and having linkages (22) pivotally extending upward to pivotally connect to mediate portions of the arms; and an adjusting ring (see figure 2) adapted to be threadingly connected to the drum stand to abut a side face of the bottom seat to cause the bottom seat to move, whereby movement of the bottom seat is able to initiate movement of the top clamping seat and thus the claws relative to the arms allows the retaining device to clamp drum of different sizes.

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose the specific use of arms with hollow arms and cutouts and has a pin extending through opposite sides of the claw such that the claw is

able to encase therein a corresponding arm and the pin is able to be received in a corresponding one of the cut outs.
